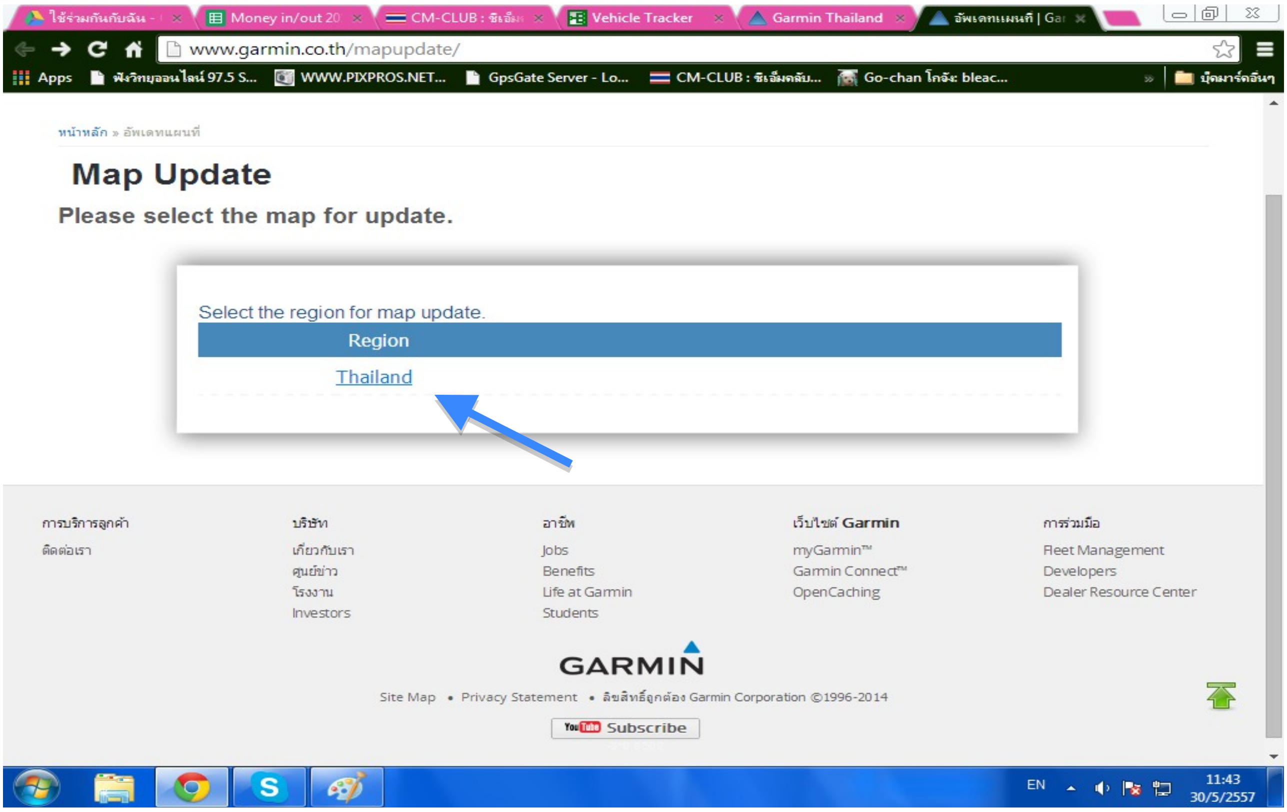
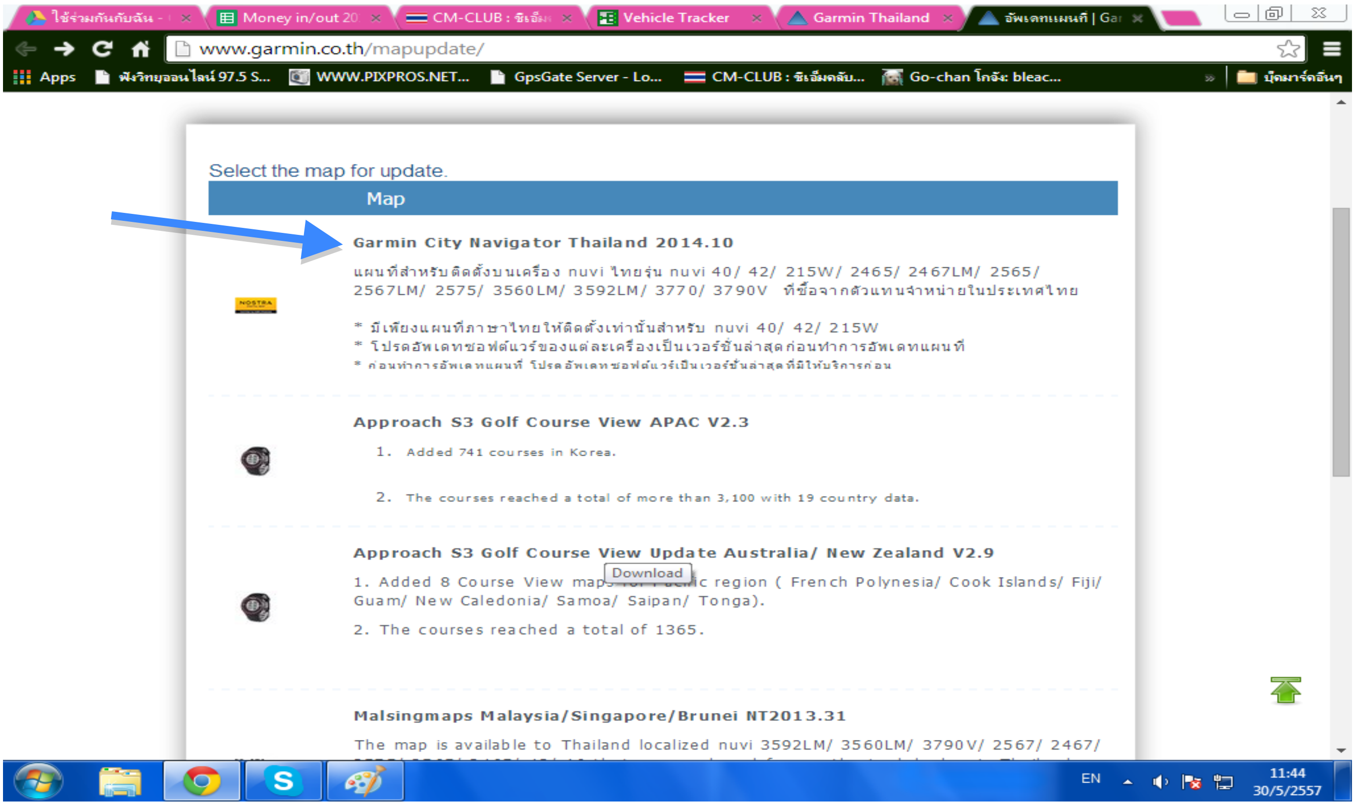
How to update the Thai map for devices with Thai OS

1. **Go to website : www.garmin.co.th**

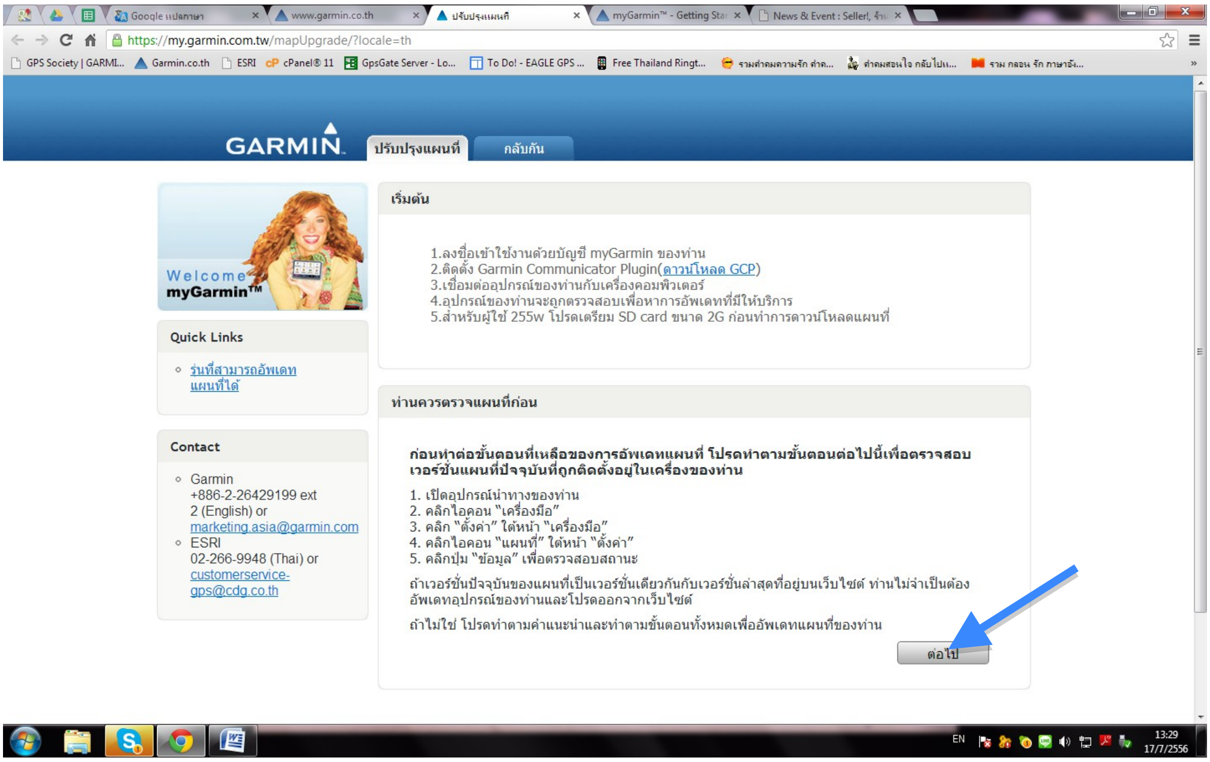
2. Click 'Thailand'



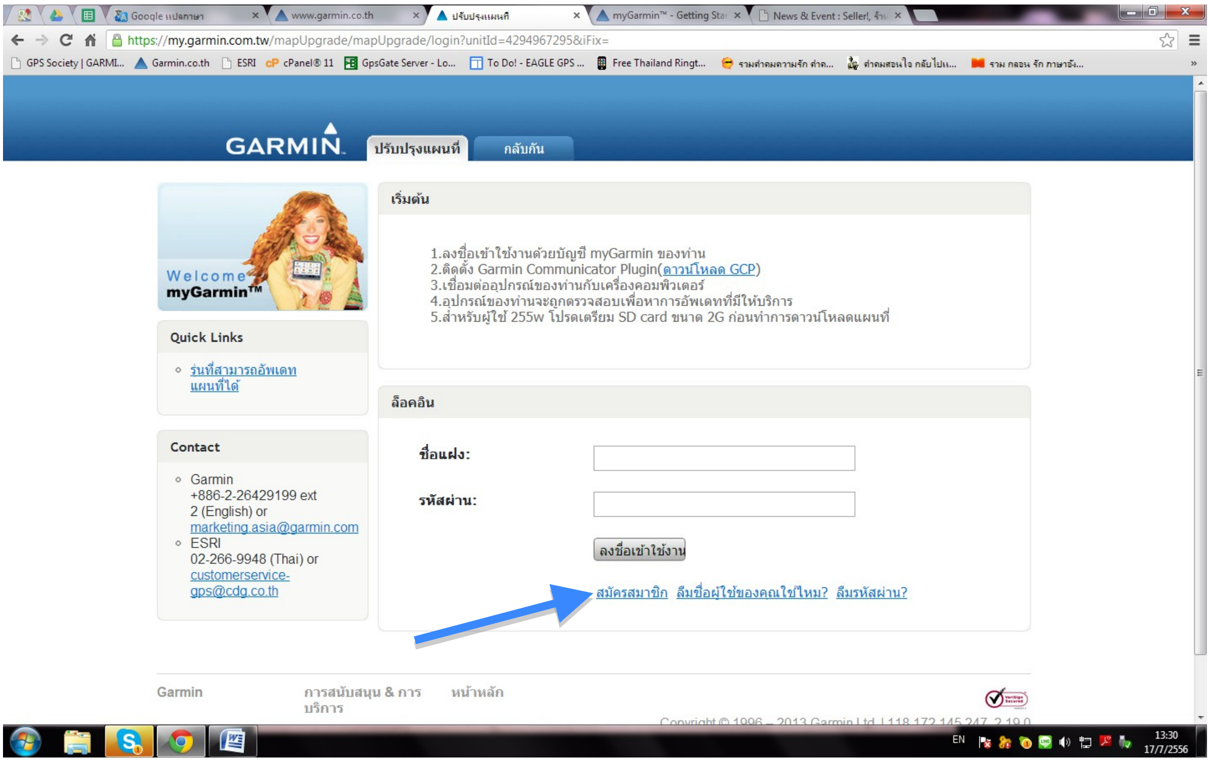
3. Click Garmin city navigation Thailand *version* (2014.10 – at the time of writing)



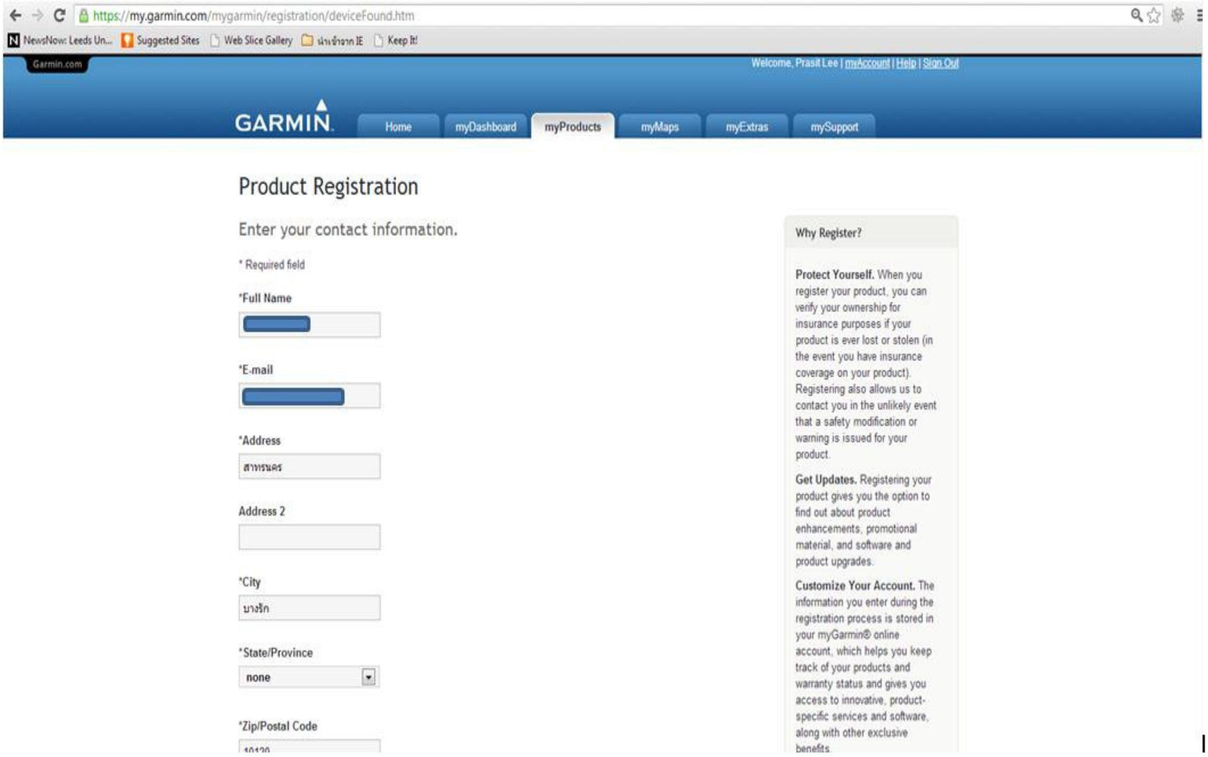
4. Product Registration – at this step, you need to connect your device to the computer.



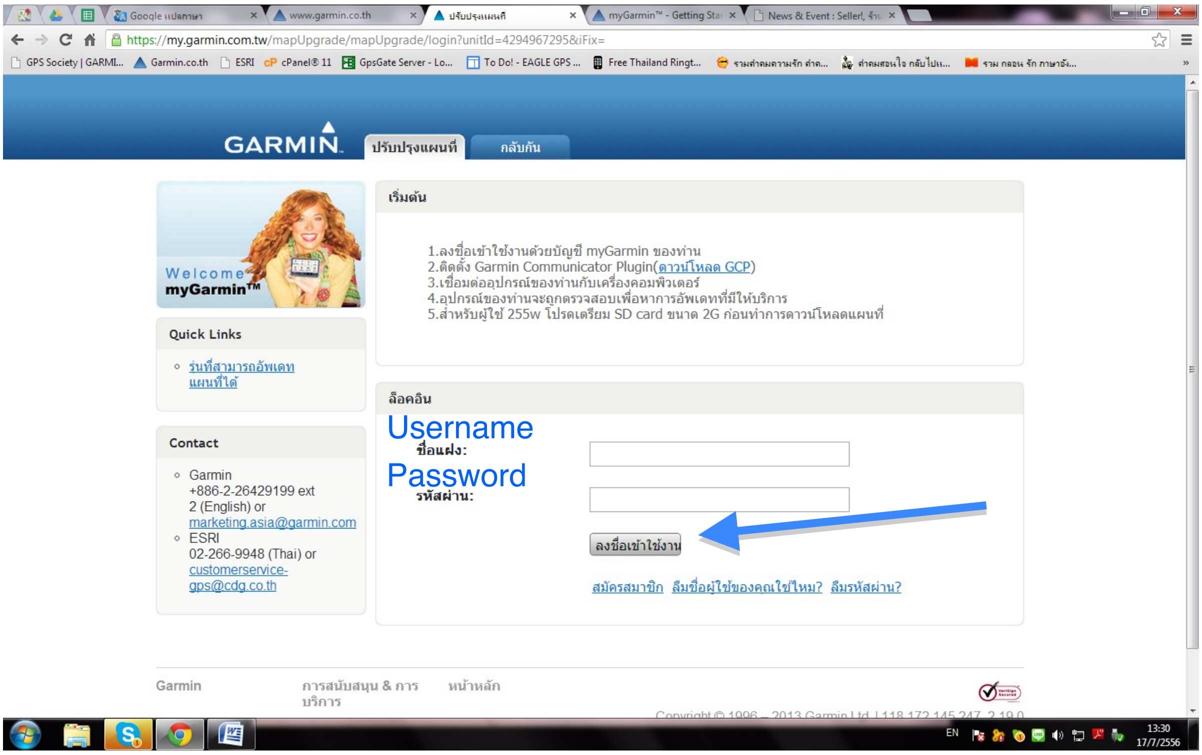
5. If the device is not registered, you'll have to do it at this step.



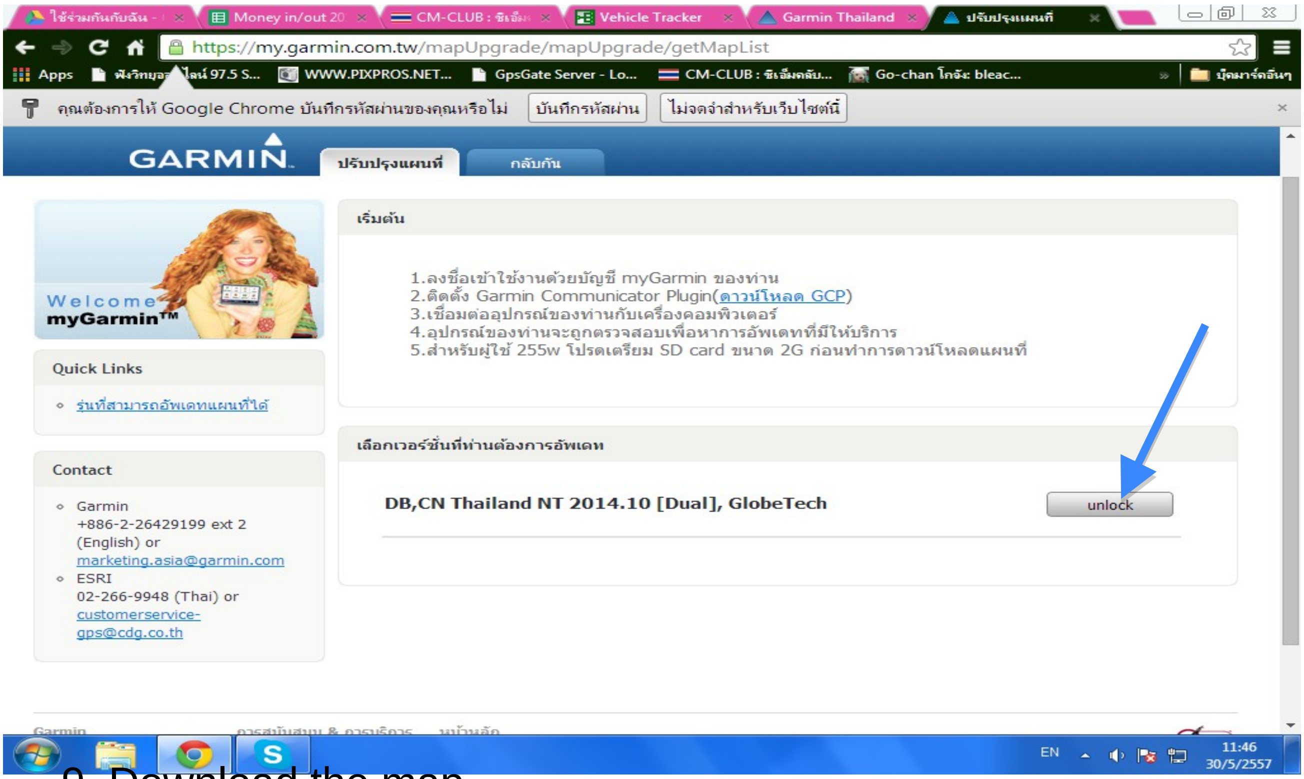
6. Enter all the required data.



7. Now using your account credentials, login.



8. Click 'Unlock'

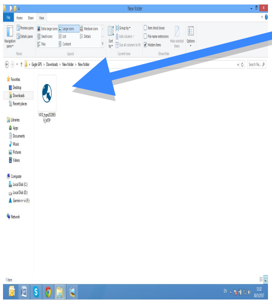


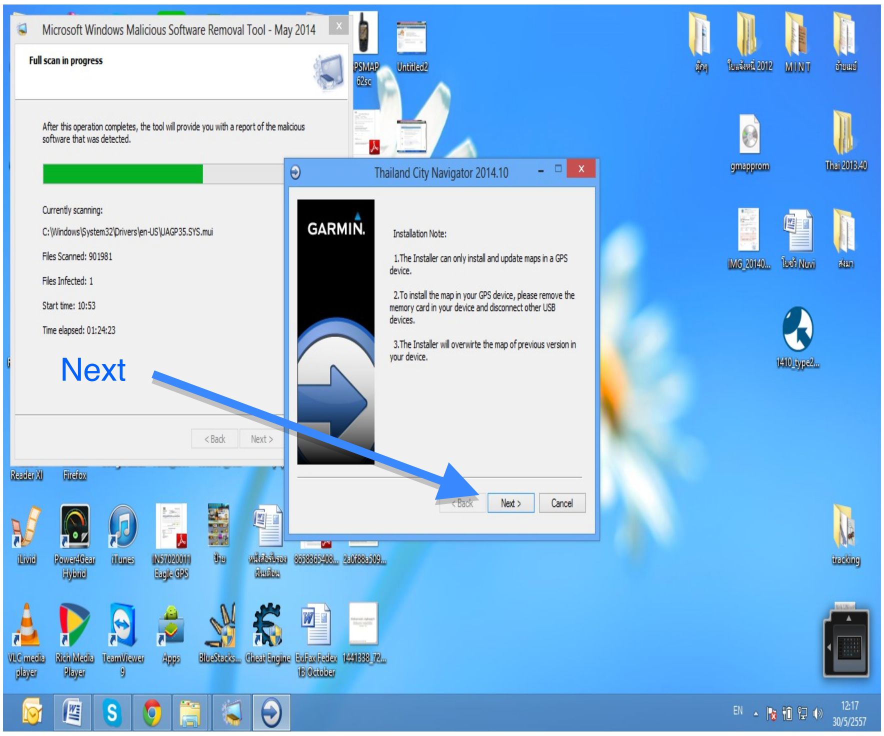
9. Download the map.

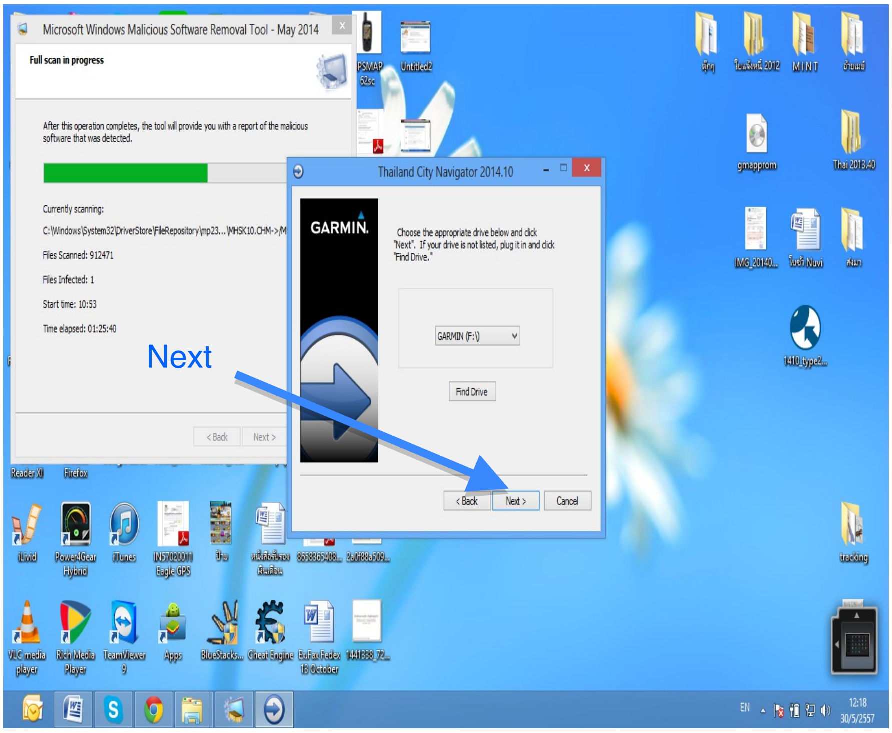
How to update the Thai map for devices with Thai OS

10. How to install the new map on your device (double click the downloaded file/map)

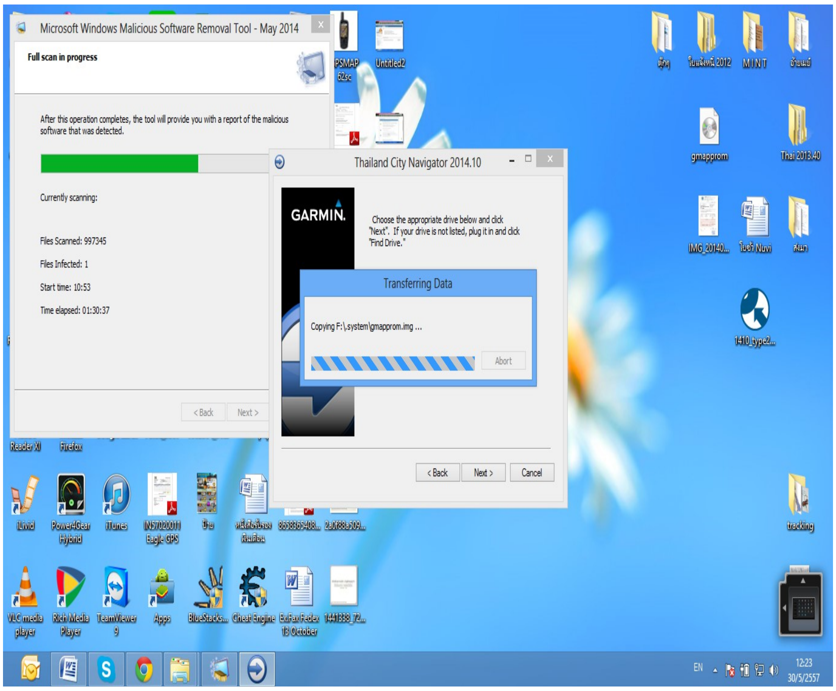
Double-click to start installing the map

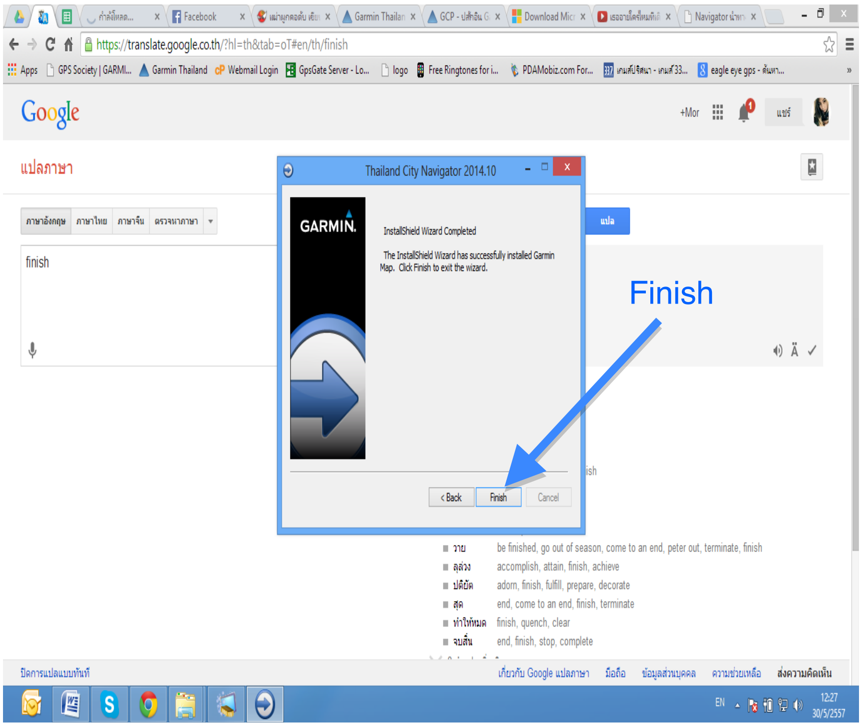






11. Wait until the installation process if finished.





12. The end of story :) Click finish. Disconnect your device, turn it on, press: settings>system>map and at the bottom of the screen 'info'. This should display all the maps you have installed on your device.
